

Major Redevelopment to Food Plant

Hawkins Steel Ltd were awarded a £1m food preparation extension for Giles Foods located in Milton Keynes. Hawkins Steel Ltd were selected based on the expertise that they have shown in completing construction projects in live food sites. The £1m project was a complete design and build package that saw Hawkins acting as both designer and principle contractor for the works.

The works included an extension to the main food preparation area and two loading docks.

Giles Foods are extremely happy that the project was delivered on time and budget with the minimum of disruption to the site throughout the build process.

The selection of the automated transfer equipment was designed and specified by Hawkins.
