

## Steel Project: Steelwork Installation

Hawkins Steel Ltd successfully negotiated with Stepnells, for the supply, fabrication and erection of a new 60 tonne structural steel frame for a new modern 3 storey community centre being built as part of the first phase of a new development at Northway in Oxford.

and CE Marked in line with BS EN 1090 standards for structural steel to Execution Class 2.

Hawkins Steel Ltd fully employed steel erectors co-ordinated all site based activity to ensure minimal disruption to other contractors onsite.

We were contracted to produce all fabrication drawings which were generated by our in-house drawing office team using Teckla software.

All fabrication was completed within our manufacturing facility
