

## Steel Project: Residential Property

Hawkins Steel were awarded the contract to detail, fabricate and install structural steel for a new prestigious residential property development.

the structure would bolt together and form the circular design. The project was a complete success and fitted 100% first

time around. All steel work was erected by our own steel erectors and completed 1 week ahead of schedule.

This was one of the most challenging jobs Hawkins has undertaken, the detailing and fabrication was extremely complex.

All fabrication was undertaken in-house to comply with BS EN 1090-2 to Execution Class 2. The inner ring of steel was trial erected to ensure that all angles and the radius were 100% accurate and
