

Leisure Centre Refurbishment

Hawkins Roofing were awarded the contract to provide the new Leisure centre feature entrance. The new feature entrance and gym formed part of the extensive refurbishment program for ISG at the Farnham Lesiure Centre.

Hawkins supplied and installed all primary and secondary steel frame works to support the feature copper clad entrance. Hawkins undertook the contract as contract design for all of the building envelope works. We developed from concept to final delivery of the copper wrapped building.

The external weathering cladding was installed using Copper strip/sheet coverings/flashings Patina; 0.7mm thick; trays laid in long strips; traditional standing seam joints at nominal 600mm centres; trays fixed with stainless steel clips to composite decking panels.
