

## Office Refurbishment

Hawkins Projects Ltd were very excited to be awarded the contract to create a new showroom facility for Visual Control Systems including extensive external works. The showroom was designed around the latest in home and cinema automation and also houses the popular Control 4 products.

The Directors of Visual Control Systems wanted to create a vibrant space that suited their brand, whilst also wanting to ensure that the design remained relevant and 'in trend' to last. Over the course of the project we new offices, meeting rooms and open plan areas to accommodate a fully functional showroom were designed and created. Visual Control Systems now find themselves thriving in their new dynamic and productive showroom facility.

The project was completed within a very tight deadline ready for the grand opening in December 2018.
